

Lansing Bobcats Indoor Track & Field

Phase 1 (Weeks 6-10): The workouts below continue to follow a "regular" season. You may choose to follow these workouts and continue along a spring track season trajectory – or you can go back and select some of your favorite workouts from previous weeks. Either way, continue to alternate high intensity days with lower intensity days. Feel free to email your coaches with questions. In case you need it: [MOBILITY & DYNAMICS ROUTINE here.](#)

Remember: abide by NY on PAUSE directives and local ordinances. The Lansing track is closed.

Cycling Modifications:

- I recommend you extend your warmups/cooldowns on the bike by about 50%. So if there's a 10 min running cooldown recommended, bike for 15 min.
- If you have a stationary bike with adjustable resistance, use this to your advantage. You can increase resistance to create race efforts and use the approximate time you'd be running the interval as the time of increased resistance on the bike.
- If you are riding a bike outdoors: SAFETY FIRST. Helmet, no headphones, ride with a phone and ID, tell someone your route. Where safe, you can use hills to mimic intervals.
- In all cases, watch your form. Tip forward from your hips and have a long spine; avoid "hunching" your back and use your hamstrings as well as your quads (A cue: picture moving your pedals through a full circle, pulling up as much as you are pushing down through your pedal strokes. Another cue: picture your feet "sliding" forward and back through the pedal stroke rather than just jamming down.)
- These are some good alternate workouts you could use in place of those listed in our weekly schedule: <https://www.runnersworld.com/uk/training/cross-training/a28632326/cycling-workouts-for-runners/>

NOTE FOR XC Runners: I will be sending an email later this week with information about an upcoming XC information meeting for you and your families. For now, you can continue to follow the track workouts listed. Soon, we will make the shift to xc preseason training; this setback for track may well be one of our best setups for summer training and an incredible fall xc season. Until then, keep up with your school work, enjoy the sunshine and shorter/quicker track workouts, and cultivate some long run daydreaming about tackling the trails...

Monday Note for Mid/Distance: You can do the increasing ladder by measurement/guesstimate of distance (ie using telephone poles/driveways/etc) or you can add 5 seconds per interval even though you're running with greater effort/speed each time.

For all athletes:

I think you have all the info you need to complete these workouts using the modifications we've sent in the past. Remember, the track is closed, so use natural markers in your neighborhood or in open, not-so-busy places to complete your run/cycle workout. You are welcome to email/text/call if you have questions!
