

# Lansing Bobcats Indoor Track & Field

Phase 3 (Weeks 11+): The workouts below continue to follow a "regular" season. You may choose to follow these workouts and continue along a spring track season trajectory – or you can go back and select some of your favorite workouts from previous weeks. Either way, continue to alternate high intensity days with lower intensity days. Feel free to email your coaches with questions. In case you need it: [MOBILITY & DYNAMICS ROUTINE here.](#)

Remember: abide by NY on PAUSE directives and local ordinances. The Lansing track is closed.

**XC Summer Training** starts this week. If you are running XC in fall OR if you want to use the XC training to prep for your fall sport, use the schedule found [here.](#)

### **Cycling Modifications:**

- I recommend you extend your warmups/cooldowns on the bike by about 50%. So if there's a 10 min running cooldown recommended, bike for 15 min.
- If you have a stationary bike with adjustable resistance, use this to your advantage. You can increase resistance to create race efforts and use the approximate time you'd be running the interval as the time of increased resistance on the bike.
- If you are riding a bike outdoors: SAFETY FIRST. Helmet, no headphones, ride with a phone and ID, tell someone your route. Where safe, you can use hills to mimic intervals.
- In all cases, watch your form. Tip forward from your hips and have a long spine; avoid "hunching" your back and use your hamstrings as well as your quads (A cue: picture moving your pedals through a full circle, pulling up as much as you are pushing down through your pedal strokes. Another cue: picture your feet "sliding" forward and back through the pedal stroke rather than just jamming down.)
- These are some good alternate workouts you could use in place of those listed in our weekly schedule: <https://www.runnersworld.com/uk/training/cross-training/a28632326/cycling-workouts-for-runners/>

**NOTE FOR XC Runners:** Starting on June 1, we will make the shift to xc preseason training; this setback for track may well be one of our best setups for summer training and an incredible fall xc season. Until then, keep up with your school work, enjoy the sunshine and cultivate some long run daydreaming about tackling the trails.... A heads up: week one of veteran preseason training has a minimum of 18 miles for the week. If you're nowhere near that mileage (and that can be running alone or a running/cross training combo), I recommend you use the next two weeks to get some easy and more regular running done to build up towards xc preseason training.

**ALL are welcome to participate in XC Summer Training:** Summer XC training is great cardio and strength for all athletes. It is posted on our program website and linked on the training schedule above. Please feel free to follow along or be in touch if you have questions.

### **For all athletes:**

I *think* you have all the info you need to complete these workouts using the modifications we've sent in the past. Remember, the track is closed, so use natural markers in your neighborhood or in open, not-so-busy places to complete your run/cycle workout. You are welcome to email/text/call if you have questions!
